ARIENS SUMMIT PRO 348

£POA

The SUMMIT PRO 348 is the ideal entry point into commercial-grade performance for service providers who need compact power without sacrificing quality. Designed with tight spaces and undulating terrain in mind, this model features a 48-inch cutting deck that balances exceptional maneuverability with robust zero-turn performance. Built with the same durability as its larger siblings, the 348 offers outstanding reliability for contractors handling structured landscapes and properties with limited access.
