

# ARIENS ZENITH E 48

## £POA

Installing batteries in a mower is one thing. Achieving the performance, durability and reliability of a proven professional petrol model is another. Our models with the FusionCore replaceable battery system meet this demand.

The ZENITH E 48 is the first professional electric zero-turn mower with interchangeable batteries. Made to mow medium to large lawns for a whole day. With a cutting width of 122 cm, it is particularly manoeuvrable between narrow obstacles and on contoured, undulating surfaces. With

### Product Details
